SUMMARY

Quality Assurance Engineer with 5+ years of experience in manual and functional testing of web and mobile applications. Experienced in test planning, test case design, regression testing, UAT support, defect lifecycle management, and cross-platform compatibility. Skilled at analyzing requirements, identifying product risks, documenting reproducible defects, and collaborating with developers and stakeholders to support stable, user-friendly software releases.

WORK EXPERIENCE

Quality Assurance Analyst | Echo Innovate IT

June 2021 – Present

- Tested web and mobile applications across multiple platforms, validating functionality, usability, and compatibility.
- Created and executed test plans, test cases, and test scenarios to verify expected behavior and business requirements.
- Collaborated with cross-functional teams to clarify requirements, report defects, and provide actionable feedback for product improvement.
- Used Jira for defect tracking and Excel for test documentation, test data organization, and traceability.
- Investigated reported issues, prioritized testing by risk, and performed retesting and regression testing after fixes.

EDUCATION

Silver Oak University | 2014 – 2018

Bachelor of Engineering, Electronics & Communication Engineering • CGPA: 7.48

Atul Polytechnic | 2011 – 2014

Diploma of Engineering, Electronics & Communication Engineering • CPI: 7.74

TECHNICAL SKILLS

Manual & Functional Testing: Manual Testing, Functional Testing, Regression Testing, Smoke Testing, Sanity Testing, Exploratory Testing, Retesting, UAT, End-to-End Testing, Integration Testing, System Testing, Non-Functional Testing, Usability Testing, Accessibility Testing, Acceptance Testing, Black-Box Testing

Test Design & Documentation: Requirement Analysis, Test Planning, Test Case Design, Test Scenarios, Test Data Preparation, Test Documentation, Test Coverage, RTM, Defect Lifecycle, Test Execution, Test Reporting

Tools & Technologies: Jira, Excel, Browser Developer Tools, Agile/Scrum, SDLC, STLC, Software Development Life Cycle, Software Testing Life Cycle

Web & Compatibility: Cross-Browser Testing, Cross-Platform Testing, UI Testing, API Testing concepts, Mobile Application Testing

Professional Skills: Analytical Thinking, Collaboration, Documentation, Patience, Problem-Solving, Effective Communication, Adaptability, Attention to Detail, Risk-Based Testing

PROJECTS

LYMÜV — Taxi Booking Application

- Performed functional, regression, smoke, exploratory, and UI testing across key taxi-booking workflows.
- Validated critical user journeys and checked booking flow behavior, usability, and input validation.

DAP ME — Professional Networking Application

- Tested user registration, profile management, and networking interactions.
- Identified defects through test coverage and regression testing to help maintain application reliability.

BUNNY BOOKS — Photobook E-Commerce Application

- Conducted usability testing to evaluate navigation and the shopping journey.
- Reported usability and consistency issues and verified fixes through retesting.

PROJECTS — CONTINUED

KINZWIN — Multiplayer Gaming Application

- Validated multiplayer workflows, session behavior, and core game functionality through functional and exploratory testing.
- Focused on identifying issues that could affect stability and the player experience.

reGive — Sustainability & Community Sharing Application

- Performed functional, regression, exploratory, and UI testing across core user workflows.
- Documented defects and validated fixes to support application reliability and usability.

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

Business Analyst — Learntube — February 2025

ISTQB Certified Tester Foundation Level (CTFL) — Planned

SELECTED ACHIEVEMENTS

- Improved testing coverage through risk-based prioritization, structured test scenarios, and regression testing.
- Applied impact-based regression testing and developer collaboration to reduce the risk of post-release defects.
- Supported release stability through proactive exploratory testing and early identification of high-impact issues.
- Contributed to on-time testing commitments through clear documentation, prioritization, and cross-functional coordination.
- Recognized for detailed defect reporting and thorough test coverage.
- Supported client UAT and release sign-off by validating critical workflows and verifying fixes.

Note: Quantified claims such as percentage reductions or issue counts should be included only when supported by verifiable project records.
